Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-9, 11, and 13-19 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Gore et al. Gore et al disclose the claimed subject matter including a fuel cell 190, an electrolyzer 195, storing water 196, hydrogen 191 and oxygen 197. Also disclosed by Gore et al is an AC or DC output (column 11, line 34) and using the device in a submarine, boat or ship (column 3, last paragraph).

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 10 is rejected under 35 U.S.C. 103(a) as being unpatentable over Gore et al in view of Del Raso. Gore et al do not disclose a three phase AC power source. Del Raso teaches a three phase AC power source (claim 6). It would have been obvious to a person of ordinary skill in the art at the time the invention was made to form the device of Gore et al with a three phase AC power source as taught by Del Raso for improved versatility.

5. Claim 12 is rejected under 35 U.S.C. 103(a) as being unpatentable over Gore et al in view of Davis. Gore et al do not disclose an absorbing DC link capacitor. Davis

teaches an absorbing DC link capacitor (column 1, line 47). It would have been obvious to a person of ordinary skill in the art at the time the invention was made to form the device of Gore et al with an absorbing DC link capacitor as taught by Davis for improved performance.

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Dederick shows a power system. Kohrs et al show a vehicle. Baumert et al show a fuel cell.
